

Meeting Minutes — Project Sync

Attendees: the team.

We discussed the main issues. It was generally agreed that it needs more work before we can move forward. Several people raised concerns about it, and we decided to revisit it next week.

Regarding the other thing, the recommendation is to handle it the usual way. We will check in on it at the next standup and see if it improved.

Action items: someone will look into it and report back. We should also make sure it is documented properly so it does not happen again.
